

Accessories for Your WARTHOG®

Optional Descaling Heads Maximize Wall Cleaning Power

For the **WS**, **WH** and **WG** models this optional head allows you the flexibility to load nozzles into the standard jetting configuration for normal sewer cleaning, or switch nozzle locations for incredible wall cleaning power. Your **WARTHOG®** can be upgraded to the descaling head option easily.

Shown below, the difference in the jetting pattern is that two additional jet ports have been added at 105°. In addition, the front boring jet has been plugged to ensure maximum power is delivered to the new, scale removing jets. The result is enhanced removal of scale, tuberculation, corrosion products, soap and minerals.

WS-1/2

WH-1/2 & WH-3/4

WG-1

WARTHOG® Accessories

WARTHOG® Centralizers

Super Centralizers are available for all WARTHOGS except the **WT-3/8**. These external cages provide several benefits, including:

- Keeps tool centered in pipe
- Reduces wear on the tool
- Provides stand-off for front jet action

Super Centralizer
WH-085 - 5.5" diameter

Super Centralizers
