

Badger 2D Line Mole - Limited Availability

The new **Badger** is the first high quality, rotation speed controlled waterblast nozzle capable of going through 4" short radius elbows. It handles up to 15,000 psi, 30 gpm, and can pull up to 100 lb. Thanks to clever design, the bearings, high pressure seal and viscous fluid governor are all nested inside the rotating head. Since waterblast hose is so stiff, it is necessary to use 3/8 in. ID hose for the 4" elbows. StoneAge's popular 1/8 npt **Attack AP2 Nozzles** are used in the **Badger**. Initial tests in pulp plant green liquor lines and reservoir drains have proven this a very effective tool for all waterblasters. Our first production batch is available for sale at \$ 1,390 each, plus nozzle tips.

Warthog Super Centralizers New Abrasion Resistant Model

The **WH 085** and **WG 085 Super Centralizers** were easy to wear out when jetting lines with lots of sand or abrasive material present. New models have a hard-face material applied where the jets cut the centralizer. The **Super Centralizers** enhance cleaning in large diameter lines, and position the front jet for maximum power to penetrate plugs.

New Website Offers "Info Center" - www.stoneagetools.com

Our website has been re-done to make it easier to find the right equipment for our customers' jobs, and to direct inquiries to the right department at StoneAge. You can make inquiries of various types, get recommendations for specific tasks, order product literature, or other informative publications. So check it out!

"Four Keys to Quality Jetting" Reprints Available

Mark House's article on the technology behind waterjet power delivery - published in the August edition of "Cleaner" - is now available in pdf format. A copy is attached to this E-Blast.

StoneAge's Video & CD Library

Bill Shires has been busy developing new videos illustrating maintenance and repair of StoneAge tools. Here is a list of the titles available at this time. The repair videos are priced at \$ 10 each. Promotional videos are free of charge.

We are proud that StoneAge tools can be easily maintained and repaired, for an indefinite service life. The new repair videos are a valuable aid that keep the tools on the job!
