## *BA-P4™ Cleans Pipe Like Never Before!*

"The run of pipe contained 4 each 90° elbows and a vertical run after 2 of the elbows.

The BA-P4™ cleaned the pipe cleaner than ever before!

Other contractors had tried cleaning the pipe with pineapples or standard tips but were never completely successful. Working space was very limited so using an RHD was not an option.

Everyone involved in the cleaning was most impressed with the ability of the Badger BA-P4™ to climb after making the elbows and of the thorough cleaning that was done without leaving streaks!" ~Jonathan in LaPlace Louisiana

### **Conditions:**

35' x 3" Pipe
