

This system features a pivoting lance that allows the waterjet to be precisely aimed for productive removal of excessive slag from key locations inside a boiler while the boiler is still online.

- Remote operated lance pivot provides 35 degrees of vertical tilt and 50 degrees of horizontal tilt
- Control pendant gives the operator precise control over lance pivot and extension to aim the high flow jet
- Fully adjustable stand allows the lance to be positioned and anchored in the boiler view port

Max Pressure	Flow Range	Vertical Tilt	Horizontal Tilt	Lance Extension	Weight
Up to 10K psi 690 bar	Up to 100 gpm 380 I/min	35 degrees	50 degrees	15 ft 4.6 m	410 lbs 186 kg
