

# Barracuda® - 20k psi

## Powerful Hand-held Rotary Nozzles

**SURFACE PREP**

**Barracuda®  
Shotgun Nozzle**

US Patent 5,909,848  
and International Patents

Two models operate from 2k to 20k psi.

### 2k-20k psi models

The **Barracuda®** sinks its teeth into tough cleaning jobs. Our leak-free seal design combined with centrifugal rotation speed control delivers more power to the surface for superior results.

The **BC-K** and **BC-K-P2** both operate from 2k-20k psi and come with a 2-jet or 4-jet head configuration respectively. As with most **StoneAge®** tools, they also come with replaceable nozzle tips.

The **Barracuda®** is excellent for difficult and irregular surfaces where a hand held operator can more efficiently maneuver the cleaning head. We recommend 4-port heads for larger surface areas with thin coating removal and 2-port heads for removal of thick deposits.

Tackles difficult surfaces easily.

- **Replaceable nozzle tips**
- **Rotation speed control**
- **No air required**
- **2 or 4 jet configuration**
- **Easy field maintenance**
- **Less than 3 lbs full weight**
- **Less maintenance than air-powered guns**

#### ADAPTERS

Adapters are available to connect the **BC-K** to 3/8 or 1/2 npt guns.

### 2-20k psi Barracuda® Specifications

MODEL	MAX. PRES.	MAX. FLOW	LENGTH	DIAMETER	INLET	JETS
<b>BC-K</b>	20k psi	15 gpm	7.8 in	1.8 in	9/16 MP	2 x <b>AP4</b>
