Centralizers and Backout Preventers

BJ Ball Style Centralizers

This style is the best for negotiating complex piping arrangements. They also handle built-up debris without stopping jet rotation. They are constructed with stainless steel, have a length of 24.4 inches and a diameter of 19.5 inches (495 mm). The maximum nipple extension these two cage centralizers is 6 inches.

MODEL	Pressure - Max.	Length	Diameter	Max. Nipple Extension
BJ 100-SS	15k psi	24.4 in. (619 mm)	19.5 in. (495 mm)	6 in.
BJ 100-20k	20k psi	24.4 in. (619 mm)	19.5 in. (495 mm)	6 in.

PIPE CLEANING

BJ 097 Vertical Style

This centralizer is for large diameter stacks and vertical ducts. The collapsible steel frame fits through manway hatches easily and has 4" plastic wheels. It comes in four sizes, listed below.

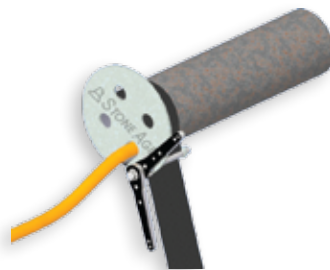

MODEL	Minimum Diameter	Maximum Diameter
BJ 097-XS	23.5 in. (597 mm)	34.5 in. (876 mm)
BJ 097-S	36.0 in. (914 mm)	56.0 in. (495 mm)
BJ 097-L	58.0 in. (1472 mm)	98.0 in. (1421 mm)
BJ 097-XL	84.0 in. (2132 mm)	144 in. (3655 mm)

Line Mole Backout Preventers

These devices are designed specifically for operator safety. They help prevent the nozzle from backing out of the pipe. Several options are available including jigs for small diameter pipes, for pipes with various flange bolt circle diameters, and adaptors for pipes with no flange entry.

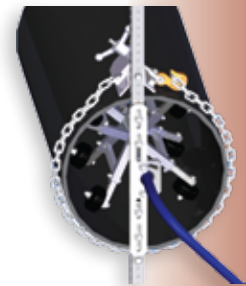

BJ 305 for 2" - 6" Pipes
Customer responsible for securing to pipe.
