

# WH, WG & WD - Large Pipes

For Trailer Jetters and Combination Trucks

## WH, WG & WD WARTHOGS®: More Power & Flow

We offer three larger **WARTHOG**® models to handle the Municipal, Industrial, and Commercial drain cleaning applications. By installing replaceable nozzle tips that are sized to get the most efficiency and effectiveness from your pump these tools become highly productive. They eliminate the need for using several types of specialty tools.

**WH-1/2 & WH-3/4**  
6"-18" Lines

The **WH-1/2** and the **WH-3/4** are the same tool but offered with different inlet port sizes to match either 1/2" or 3/4" npt. The **WH** models are best for 6"-18" lines. These tools are most commonly used with small combination trucks and large trailer jettors.

**WG-1**  
8"- 36" Lines

The **WG-1** is the proven choice for municipalities who are faced with cleaning pipes from 8"- 40". Large combination trucks with 1" hose use this tool predominately. Municipalities all across America are relying on this tool to handle their biggest challenges.

**WD 1-1/4**  
High Flow Model

The **WD 1-1/4** is designed to handle all the same applications as the **WG-1** except it can handle 80-120 gpm. The 1-1/4" inlet combined with 7 ports effectively distribute the higher flows.
