

Manhole Cleaning

Safety and productivity for Cleaning Manholes

The Manhole Cover Plate with Warthog® nozzles:

Municipalities and relining contractors can add safety and productivity by combining the **Manhole Cover Plate** with our rotating **Warthog®** nozzle. The cover plate guides the hose while also protecting the operator from the splashback and the risk of being struck by the tool or jets. The speed controlled rotation of the **Warthog®** nozzle provides exceptional and consistent cleaning results.

The **Manhole Cover Plate** assembly.

The **Manhole Cover Plate** adjusts easily to different sizes of entry ways. The **Warthog®** tool is lowered down through the plate using the hose reel commonly found on combination vehicles.

- **Increased Safety**
- **Exceptional Productivity**
- **Installs to Different Size Entries**
- **Adapts to Your Existing Nozzle**

The **Warthog®**, sold separately, can be fitted with a different head to allow pipe extensions which provide more powerful and effective jetting.

Manhole Cover Plate
