

Powerplant Cleaning

Solutions for cleaning the toughest powerplant applications

Power plants offer some of the most challenging waterblast applications due to confined spaces and tough product removal. These products are designed to keep operators away from the high pressure water while removing thick deposits on Pendant tubes, Economizer Bundles, Super Heaters, and Pent Houses, and Boilers.

**SM 300 for
Pendant Tubes**

SM 300 cleaning
vertical Pendant tubes

**SM 2D for
Large Tanks**

SM Air with extension
arms cleaning large
vertical stacks

Blastrack

Our modular Blastrack system can be portable or fixed in place to provide consistent and safe operation.

Large surface cleaning

Boiler Floor Washer

The Boiler Floor Washer allows operators the ability to send in a high flow rotating lance into hot furnaces and boilers.
