

Tunnel Cleaner

Clean Large Pipes with increased Safety and Productivity

The **Tunnel Cleaner** can be easily reassembled inside the pipe.

- **Can accommodate 15k, 20k, or 40K psi**
- **4' - 12' Diameter of Pipe**
- **Controlled Rotation**
- **2 or 4 Self-Rotary Nozzles**
- **Field Repairable**
- **Power Driven Option**

Tunnel Cleaner Specs		
MODEL	Tunnel Cleaner	
Maximum Pressure	15k, 20k, or 40k psi	
Rotation Rate	2 - 100 rpm	
Maximum Flow	60 gpm	133 lpm
Propulsion Rate	3 - 100 ft/min	
Weight	400 lbs	180 kg
Length, Max.	15 ft	4.5 mtrs
Pipe Size Range	4 - 12 ft	1.5 - 3.5 mtrs

Tunnel Cleaner Advantages

The **Tunnel Cleaner** combines safety, consistency, and productivity for cleaning large diameter pipes. The modular construction easily passes through manhole sized entries and adjusts to different pipe sizes. This tested and proven concept utilizes self-rotary **Barracuda**® nozzles mounted on an air powered rotating manifold. The manifold can use either 2 or 4 rotating nozzles. The range of speed rotation of the air powered manifold is determined by the gearbox ratio and is adjustable with air flow restriction. The rotating manifold is then extended and retracted along the chassis rail.

The **Tunnel Cleaner** can be designed with an optional drive system that is integrated with the wheels. The propulsion speed is adjustable similar to the manifold rotation.

The **Tunnel Cleaner** can easily exceed the productivity of manual methods of surface cleaning. Call us and we can discuss what pressure and options would best suit your application.

Choose the pressure that best meets your needs!
