

# The Sabertooth

## Dual Hose Assembly for Tube Cleaning

### Our System is Superior to Manual Methods

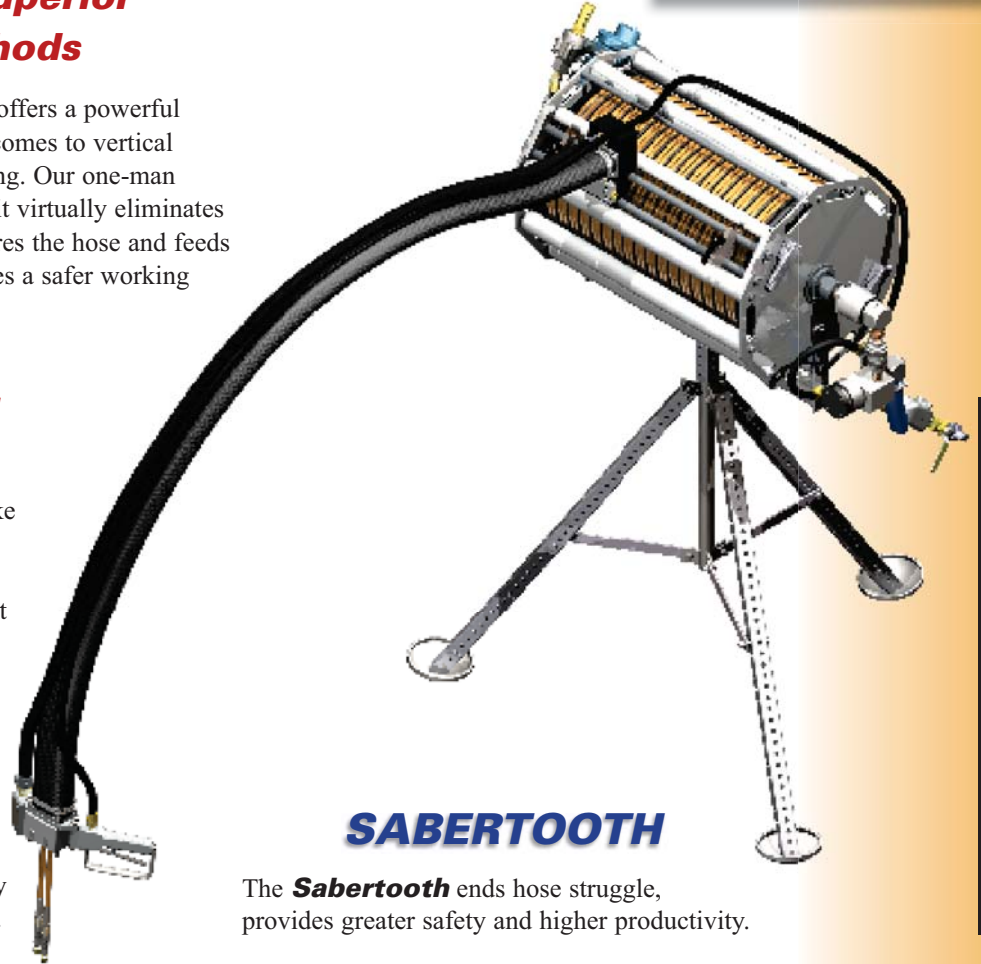

The **Sabertooth** hose reel assembly offers a powerful alternative to manual methods when it comes to vertical evaporator tubes and other process piping. Our one-man system is more powerful, it's safer and it virtually eliminates stand-by crews. The retractable reel stores the hose and feeds it out so there's no tangle which provides a safer working environment.

### 15k or 20k psi Power For 3/4" to 2" Tubes

The **Sabertooth** has easy to use stroke and speed adjustments, plus the hand controls include a pressure dump. The handy tripod mount and full assembly fit through an 24" man way.

### Banshee rotary nozzles

We recommend using our **Banshee** rotary tube nozzles for the best possible results.

## SABERTOOTH

The **Sabertooth** ends hose struggle, provides greater safety and higher productivity.

TUBE CLEANING

Sabertooth		
Model	SBT-15K*	SBT-20K*
Max. Pressure	15 Kpsi 1,000 Bar	20 Kpsi 1,380 Bar
