'WE WANT YOU TO BE READY'
— KERRY SIGGINS

The world of industrial cleaning has been rapidly evolving over the last several years. Chemical plants and refineries around the world now demand that contractors use safer, more productive processes and equipment in their facilities.

Contractors who can adapt their methods to meet these new requirements will define success. Those who ignore the changes risk declining reputations and the steady loss of contracts.

At StoneAge, it is our mission to ensure that our customers are successful, which is why we've developed the best nozzles in the industry as well as CE certified, hands-free automated solutions for almost all industrial cleaning applications.

Of course, industry leading products are only part of the equation – for us, providing exceptional customer experience and world class technical support carry equal weight. So this year we are excited to provide increased support for our customers by expanding our rental program in North America and opening a new StoneAge location in the United Kingdom to support direct and dealer sales throughout Europe.

As StoneAge products are steadily adopted across the globe, we are committed to providing our growing customer base with fast and accurate access to localized stock, training, repair, and support – which is why **we are delighted to have launched StoneAge Europe, our European sales and distribution facility, based in the United Kingdom.**

Staffed with experienced industry professionals, we are ready to ship and service product throughout all of Europe. Our European team is just a phone

call away and able to provide in-depth product training and demonstration to help our customers successfully use our products to win and keep contracts. We also have plans to add facilities in Western Europe in the near future.

In North America we are continuing to expand the StoneAge Rental program to meet demand, giving contractors greater flexibility, and allowing them to go after new contracts with the confidence that they can expand their fleet of equipment as needed. **This year we are pleased to partner with Joe Johnson Equipment to bring StoneAge sales, service and rentals direct to contractors in Canada.** All StoneAge rental locations are fully equipped to provide back-up equipment, spare parts, expert technical support, and a full range of compatible hoses and fittings so that our customers have convenient access to everything they need for a job in one stop.

When your opportunity arrives to deliver great results for your customers, to excel in the face of a challenge, or to grow your business, we want you to be ready.

Our goal is to inspire you to say, "Why would I choose anyone but StoneAge?"

Kerry Siggins
Chief Executive Officer, StoneAge Inc.
