COMPASS

(formerly known as the ProPositioner)

FOR VERTICAL, HORIZONTAL AND
ENCLOSED BUNDLE CLEANING

The Compass is a remotely operated positioning system for single-lance tube cleaning.

- Designed to pair with the versatile ProDrive single lance tractor
- Radial motion from a single connection point enables operator to access all tubes in most bundles without remounting
- Lightweight and compact for portability and quick set-up

Add the Confined Space Kit to configure the Compass for Domed Bundle Cleaning.
(formerly known as the ProP-DBP)

- Adds a camera system to enable accurate indexing from safely outside the enclosure
- Adaptable spider mount attaches quickly and reduces the need to remount equipment
- Curved guide tube makes it easy to reach perimeter tubes against the dome wall
