

Product Obsolescence Notification

Issue Date: June 7th, 2018

Dear Customers,

The purpose of this notification is to announce changes and obsolescence's within the Box Rail Lancing Machine product offering

Change Description:

StoneAge is replacing its current Box Rail Lancing Machine offering with an improved ordering system that uses a standard base and positioner. The system adapts to single, dual, or triple lancing requirements in either 15/22K or 40K with different swivel packages that come with plugs to block unused holes when necessary. The system comes with a standard 15ft drive package and adapts to different lengths with 5, 10, or 15ft extension kits. This new setup allows for less complicated ordering, and gives customers the ability to quickly switch between number of lances, and pressures without purchasing a new system thus giving them greater value for their purchase.

Please refer to the following page for a list of top level assemblies becoming obsolete

Please refer to our website or contact your sales representative for our new offerings

Replacement part Options

StoneAge will support wear items for the assemblies for approximately one year. Support parts may have a significant lead time and are subject to price change; please call for a quote to ensure proper pricing and to obtain lead time estimations.

If you have any questions, please contact your account representative or me directly. Thank you.

Regards,

Melissa Emery-Lundstrom
